## Atoms, subatomic particles, and electronic configurations

## Your task

Use your periodic table to help you complete the table of information below.

## Remember:

- all chemical symbols consist of one or two letters (the first letter is always a capital letter)
- the bottom number in each full symbol is the number of protons in the element's atoms
- the number of neutrons is equal to the top number minus the bottom number
- the number is electrons in an atom is the same as the number of protons
- the electronic configuration is linked to the element's position in the periodic table.

One row has been done for you.

| Element name | Symbol | Number of protons | Number of neutrons | Number of electrons | Electronic configuration |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | ${ }_{1}^{1} \mathrm{H}$ |  |  |  |  |
|  | ${ }_{2}^{4} \mathrm{He}$ |  |  |  |  |
