## Subatomic particle calculations

1. Complete the table below. Use a GCSE periodic table to help you, but do not use the relative atomic masses there (they are not mass numbers). One row has been done for you.

| Name | Isotopic symbol | Atomic number | $\begin{gathered} \text { Mass } \\ \text { number } \end{gathered}$ | Number of: |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | Protons | Neutrons | Electrons |
| Hydrogen | ${ }_{1}^{1} \mathrm{H}$ |  | 1 |  | 0 |  |
| Lithium | ${ }_{3}^{7} \mathrm{Li}$ | 3 |  |  | 4 |  |
| Oxygen | ${ }_{8}^{18} \mathrm{O}$ | 8 | 18 | 8 | $(18-8)=10$ | 8 |
| Aluminium |  | 13 |  | 13 | 14 |  |
|  | ${ }_{17}^{37} \mathrm{Cl}$ | 17 |  |  |  | 17 |
| Argon |  |  |  |  | 22 |  |
| Copper |  |  | 65 |  | 36 |  |
|  |  |  | 81 |  |  | 35 |
|  | ${ }_{92}^{238} \mathrm{U}$ |  |  |  |  |  |

2. (a) Explain why atoms are neutral, even though protons and electrons are charged particles.
(b) Explain why the number of electrons is not included in mass numbers.

## Subatomic particle calculations

1. Complete the table below. Use a GCSE periodic table to help you, but do not use the relative atomic masses there (they are not mass numbers). One row has been done for you.

| Name | Isotopic symbol | Atomic number | Mass number | Number of: |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | Protons | Neutrons | Electrons |
| Hydrogen | ${ }_{1}^{1} \mathrm{H}$ |  | 1 |  | 0 |  |
| Lithium | ${ }_{3}^{7} \mathrm{Li}$ | 3 |  |  | 4 |  |
| Oxygen | ${ }_{8}^{18} \mathrm{O}$ | 8 | 18 | 8 | $(18-8)=10$ | 8 |
| Aluminium |  | 13 |  | 13 | 14 |  |
|  | ${ }_{17}^{37} \mathrm{Cl}$ | 17 |  |  |  | 17 |
| Argon |  |  |  |  | 22 |  |
| Copper |  |  | 65 |  | 36 |  |
|  |  |  | 81 |  |  | 35 |
|  | ${ }_{92}^{238} \mathrm{U}$ |  |  |  |  |  |

2. (a) Explain why atoms are neutral, even though protons and electrons are charged particles.
(b) Explain why the number of electrons is not included in mass numbers.

## Subatomic particle calculations - ANSWERS

1. Complete the table below. Use a GCSE periodic table to help you, but do not use the relative atomic masses there (they are not mass numbers). One row has been done for you.

| Name | Isotopic <br> symbol | Atomic <br> number | Mass <br> number | Number of: |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |
| Hydrogen | ${ }_{1}^{1} \mathrm{H}$ | 1 |  | 1 | 0 | 1 |
| Lithium | ${ }_{3}^{7} \mathrm{Li}$ | 3 | 7 | 3 | 4 | 3 |
| Oxygen | ${ }_{8}^{18} \mathrm{O}$ | 8 | 18 | 8 | $(18-8)=10$ | 8 |
| Aluminium | ${ }_{8}^{27} \mathrm{Al}$ | 13 | 27 | 13 | 14 | 13 |
| Chlorine | ${ }_{13}^{37} \mathrm{Cl}$ | 17 | 37 | 17 | $(37-17)=20$ | 17 |
| Argon | ${ }_{18}^{40} \mathrm{Ar}$ | 18 | 40 | 18 | 22 | 18 |
| Copper | ${ }_{29}^{65} \mathrm{Cu}$ | 29 | 65 | 29 | 36 | 29 |
| Bromine | ${ }_{35}^{81} \mathrm{Br}$ | 35 | 81 | 35 | $(81-35)=46$ | 35 |
| Uranium | ${ }_{23}^{238} \mathrm{U}$ | 92 | 238 | 92 | $(238-92)=146$ | 92 |

2. (a) The number of positive protons is equal to the number of negative electrons.
(b) The mass of an electron is negligible / very small compared to the mass of a nucleus.
